

2020
Industry Studies Association
Annual Conference
June 3-5, 2020

~WELCOME~

John Paul MacDuffie, President of the Industry Studies Association

On behalf of the board of the Industry Studies Association, welcome to Boston/Cambridge and the 2020 Annual ISA Conference. I'm looking forward to a terrific set of sessions and panels, and I'm glad you're here to join us at this meeting. This year's location highlights the core purpose of our association. We build knowledge together through deeper understanding of firms, industries, and the broader context in which they operate.

Our conference takes place at MIT's Samberg Center, just blocks from Kendall Square in Cambridge. The history of Kendall Square is a microcosm of economic, technological, and social change in the U.S. First a transportation hub in the 1800s, by the early 20th century, Kendall Square was home to distilleries, electric power plants, and soap, hosiery and boiler factories. Picked as the potential future home of NASA by President John F. Kennedy – but losing out to Houston – the surrounding area, cleared of factories and warehouses, sat mostly vacant until the 1990s and 2000s. Now some call Kendall Square "the most innovative square mile on the planet," in reference to the high concentration of entrepreneurial start-ups (i.e. 62 new public companies with a combined market value of about \$170 billion as of 2018) and quality of innovation, particularly in biotechnology, which have emerged since 2010. Nearby, in Boston, is another cluster of firms pioneering in advanced manufacturing technologies like 3D CAD, generative design, augmented and virtual reality, and spatial computing; ISA will offer a pre-conference excursion to visit some of its key firms. Our plenary sessions and activities are designed to take advantage of this terrific location.

I'm excited about the special events we have organized for this year's conference. At our opening plenary on the conference theme – "Work of the Future" – hear the views of leading researchers on which jobs and skills are most affected by new technologies; whether or not robots and artificial intelligence-fueled software will displace human labor at unprecedented rates; and the choices available to technologists, managers, and policymakers in shaping the future human-technology relationship. Our second plenary features the biopharmaceutical industry, focusing on the tensions and tradeoffs between "Pricing and Innovation". At the same time as personalized medicine based on biosimilar innovations appears closer than ever, the prices of medications looms large as a major political issue and continuing public health concern.

Two sessions feature the authors of recent books writing on topics well-aligned with ISA's research community. Katherine Eban's Bottle of Lies explores the sources of recent problems of manufacturing quality in the global supply chain for generic pharmaceuticals, revealing a "dark side" of globalization and the immense challenge of enforcing global norms and standards. Mary Gray's Ghost Work shines a spotlight on the thousands, perhaps millions of contract workers around the world who perform the small but crucial tasks that underpin some of the Internet's most popular (and pervasive) applications, e.g. Facebook, Google, Uber. It's a "gig economy" hidden to most of us yet we should ponder its lessons.

I have a word of encouragement for those of you who are new to this meeting. Most of our ISA regulars come to this conference largely because they enjoy learning from others with similar interests and different perspectives. Similarities often revolve around commitment to learning from data, to working on relevant issues, and to engaging first-hand with phenomena in the field. Different perspectives arise from variation in industry contexts for research, from the wide range of disciplines represented at the conference, and from a multitude of methods of inquiry. We deliberately build in time for informal networking, and we try to structure sessions to encourage discussion. Come on into the conversation!

Our association relies on volunteers and on the generosity of sponsors to stay vibrant. Thanks are due to the Ewing Marion Kauffman Foundation, The Carson College of Business at Washington State University, the Institute on Work and Employment Relations and the Industrial Performance Center at MIT, and the Mack Institute of Innovation Management at the Wharton School, U. Pennsylvania. Over the next few days, also pass on a word of thanks to our program committee for assembling a great lineup. Our program chairs— Liz Reynolds, Ingrid Nembhard, and John Gray—have worked for months with our track chairs and others to bring things together. Our executive director, Stephanie Rink, has done a great job of leading our conference planning across the board. Make sure you say "hi" to Stephanie and introduce yourself so she has a chance to get to know the members she's serving.

All of us look forward to welcoming you to MIT's Samberg Center by the Charles River in June. It's a lovely time of year in Cambridge and we have great spaces for all of our receptions. Be sure to seek out me, the Program Chairs, and members of the Board with your ideas for how to make ISA better. We may then try to get you more involved – which is definitely a win-win proposition! See you soon.

John Paul MacDuffie
President

Conference in Brief

LOCATION

MIT Samberg Conference Center
Chang Building (E52)
50 Memorial Dr
Cambridge, MA 02142

REGISTRATION

Wednesday, June 3:	5:30 pm — 7:00 pm	MIT Samberg 7th Floor Lobby
Thursday, June 4:	8:30 am — 4:00 pm	MIT Samberg 7th Floor Lobby
Friday, June 5:	8:30 am — 11:30 am	MIT Samberg 7th Floor Lobby

WEDNESDAY June 3, 2020

2:30 pm — 5:30 pm	Excursion TBD
12:00 pm — 5:00 pm	Professional Development Luncheon & Workshop
6:00 pm — 7:00 pm	Industry Studies Association Welcome Reception

THURSDAY June 4, 2020

9:00 am — 10:30 am	Welcome and Plenary I: The Work of the Future
10:45 am — 12:00 pm	Panel Sessions 1A—1I
12:15 pm — 1:30 pm	Luncheon and Plenary II: Reflecting on Industry Studies
1:45 pm — 3:00 pm	Panel Sessions 2A—2I
3:15 pm — 4:15 pm	Special Feature I: Globalization, Norms, and Integrity
4:30 pm — 5:45 pm	Panel Sessions 3A—3I
6:00 pm — 7:30 pm	Industry Studies Association Conference Reception & Awards Presentation

FRIDAY June 5, 2020

9:00 am — 10:00 am	Special Feature II: Ghost Work with author Mary L. Gray
10:15 am — 11:30 am	Panel Sessions 4A—4I
11:45 am — 1:00 pm	Luncheon and Plenary III: Pricing and Innovating
1:15 pm — 2:30 pm	Panel Sessions 5A—5I
2:45 pm — 4:00 pm	Panel Sessions 6A—6I
4:10 pm — 5:00 pm	Conference Closing Remarks and Business Meeting

RUNNER-UP

Presentation:

Dissertation Award

WINNER

Presentation:

RUNNER-UP

Emerging Scholar in Innovation and Entrepreneurship Award

This award has been made possible with the generous support of the Ewing Marion Kauffman Foundation.

This award recognizes an early or mid-career industry studies scholar conducting exceptional research in the area of innovation and entrepreneurship. The award winner demonstrates significant personal investment in understanding the markets, firms, and institutions of an industry and frequently involves the integration of director observation through field based research with appropriate theory and analysis.

Research Stream Legend

Throughout the conference schedule, panels indicate which one of the eight ISA research streams they represent by the following abbreviations and color scheme:

1. **Energy, Power, & Sustainability (EP&S)**
2. **Healthcare (H)**
3. **Globalization: Management & Policy Implications (G:M&PI)**
4. **Innovation & Entrepreneurship (I&E)**
5. **Technology Management (TM)**
6. **Labor Markets, Organizations, & Employment Relations (LMO&ER)**
7. **Operations & Supply Networks (O&SN)**
8. **General Industry Studies (GIS)**

Conference Program: Wednesday, June 3

EXCURSION: Location?

2:30 pm — 5:30 pm Pre-registration required

PROFESSIONAL DEVELOPMENT WORKSHOP

12:00 pm — 1:00 pm *Luncheon* Samberg Dining 4

1:00 pm — 5:00 pm *Workshop* Samberg Dining 3

ISA BOARD MEETING (board members only)

8:00 am — 12:00 pm Samberg Salon East

INDUSTRY STUDIES CONFERENCE WELCOME RECEPTION

6:00 pm — 7:00 pm Samberg Salon I/T/West

Conference Program: Thursday, June 4

WELCOME BY THE ISA PRESIDENT | John Paul MacDuffie

PLENARY I

9:00 am — 10:30 am Samberg Salon MIT

BREAK

10:30 am — 10:45 am Samberg 6th Floor Lobby

PANEL SESSIONS I

10:45 am — 12:00 pm See Program Details

LUNCHEON & PLENARY II

12:15 pm — 1:30 pm Samberg Salon MIT

PANEL SESSIONS II

1:45 pm — 3:00 pm See Program Details

BREAK

3:00 pm — 3:15 pm Samberg 6th Floor Lobby

SPECIAL FEATURE I

3:15 pm — 4:15 pm Samberg Salon MIT

4:30 pm — 5:45 pm See Program Details

ISA ANNUAL CONFERENCE RECEPTION & AWARDS PRESENTATION

6:00 pm — 7:30 pm Salon MIT

Thursday, June 4

9:00—10:30 am

PLENARY I: The Work of the Future

Panelists' Bios

Advances in artificial intelligence, robotics, and other related technologies are creating new technological capabilities that can both replace and enhance human physical and increasingly, cognitive activities. This creates significant possibilities for reimagining and redesigning work, enhancing the human-technology interface, increasing the connectivity within supply chains, and many other positive implications for workers, firms and society at large. But it also generates uncertainty and anxiety about the future of work, and whether technological change can be harnessed to benefit everyone. David Mindell, co-chair of MIT's Work of the Future Initiative, and Tom Kochan, from MIT Sloan's Institute of Work and Employment Studies, will lead a multidisciplinary panel in addressing these issues.

Moderator: David Mindell

Moderator: Tom Kochan

Panelists' Bios

PLENARY II: Reflecting on Industry Studies: 30 years of MIT Industrial Performance Center and the ISA

Richard Lester is the Japan Steel Industry Professor and Associate Provost at MIT, where he oversees the international engagements of the Institute. He is also the founder and faculty director of the Industrial Performance Center (IPC) as well as founding member of the Industry Studies Association. During lunchtime remarks, Professor Lester will describe the evolution of the IPC, its linkage to ISA, what has been learned from the evolution of both organizations, and what we hope the next 30 years will bring for them as well as all of us who engage in industry studies.

Richard Lester

Panelists' Bios

SPECIAL FEATURE I: Globalization, Norms, and Integrity: The Case of Pharmaceuticals

Does there exist a "Future of Work" in which a global set of norms exist, and are consistently adopted? Katherine Eban will discuss her 2019 New York Times Best Seller, *Bottle of Lies*, in which she uncovers the fraudulent activities of many manufactures of generic medicines. Eban and discussants will consider to what extent fraudulent work practices and threats to integrity-based norms are unique to the pharmaceutical industry; and/or simply another manifestation of differing norms around the globe. They will then debate the path to consistent adoption of global norms, and the extent to which it will be driven by governments, non-governmental organizations, and/or industry

Facilitator: John Gray

Author: Katherine Eban, an investigative journalist, is a *Fortune* magazine contributor and Andrew Carnegie fellow. Her articles on pharmaceutical counterfeiting, gun trafficking, and coercive interrogations by the CIA, have won international attention and numerous awards. Her second book *Bottle of Lies: The Inside Story of the Generic Drug Boom* (Ecco/HarperCollins 2019) is a *New York Times* bestseller. Educated at Brown University and Oxford, where she was a Rhodes Scholar, Eban lives in Brooklyn, New York, with her husband, two daughters and Newfoundland dog Romeo.

Richard Saynor, CEO Sandoz

Thursday, June 4

BREAK 10:30 am — 10:45 am

Samberg 6th Floor Lobby

PANEL SESSION ONE 10:45 am—12:00 pm

1A: Integrating New Technologies into the Energy Sector (EP&S)

Location

Chair:

Increasing Demand and a Tradeoff Between Speed-Cost Efficiencies and Total Profits
Minjae Lee (Southern Connecticut State University)

Institutional Embeddedness, Behavior and Performance Implications: A Comparative Study of Chinese and German Solar PV Industries During Market Transitions

Steven White (Tsinghua University)

Wei Zhang (Tsinghua University)

Michael Nauruschat (technical University of Berlin)

Integration of Smart Grid Technologies by Electric Utilities; Patterns, Motivations, Challenges, Success Factors, Practices and Influence of the Field

Ehsan Sabaghian (Syracuse University)

Jason Dedrick (Syracuse University)

1B: Patients and Professions (H)

Location

Chair:

A Mixed-Method Study: Does Quality of Patient Care Affect Patient Satisfaction in U.S. Inpatient Acute Care Hospitals?

Jennifer Wilbers (A.T. Still University of Health Sciences)

Lihua Dishman (A.T. Still University of Health Sciences)

John Fick (A.T. Still University of Health Sciences)

Why is Operational Succession Planning Important to Managing Employee Turnover in the United States Healthcare Services Industry?

Heather Moore (A.T. Still University of Health Sciences)

Lihua Dishman (A.T. Still University of Health Sciences)

John Fick (A.T. Still University of Health Sciences)

The Job of Being a Patient

Michael Anne Kyle (Harvard Business School)

The Impact of Acquisitions on Clinical Decisions: Evidence from Physician Practice Management Companies

Ambar La Forgia (Columbia University)

When Innovative Practices Impact on Professions: New forms of Collaborations Between Nurses and Physicians

Paola Roberta Boscolo (Bocconi University)

James Barlow (Imperial College Business School)

1C: Manufacturing, Robots, and Changing vs. Disappearing Jobs (LMO&ER) Location

Chair: Andrew Stettner (The Century Foundation)

Workforce Education—Ready for Retooling in Manufacturing and Beyond
William Boone Bonvillian (MIT)

How Choices About Work Organization and the Division of Labor May Shape Manufacturing Work of the Future
Christophe Combemale (Carnegie Mellon University)
Erica Fuchs (Carnegie Mellon University)

How Robots Are Beginning to Affect Workers and Their Wages
William M. Rodgers III (Rutgers University)
Richard Freeman (Harvard University)

Workplace Automation and the Gender Gap in Human Capital
Amanda Chuan (Michigan State University)

Exactly Your Grandpa's Shoes: Historical Legacies of Place in Revitalizing a Decimated Industry
Sunasir Dutta (University of Minnesota)

1D: Social Entrepreneurs and Problem Solvers (I&E) Location

Chair:

Seeing Parochially And Acting Locally: Social Exposure, Problem Identification And Social Entrepreneurship
Sunasir Dutta (University of Minnesota)

Improving the Small Business and Entrepreneurship Support System in Distressed Urban Areas
Darwin Gray (Initiative for a Competitive Inner City)
Chris Scott (Initiative for a Competitive Inner City)
Howard Wial (Initiative for a Competitive Inner City)

A Time & Place: Experimentation, Circumvention, and the Role of Aid Agencies In Industry & Market Creations
Sonali K. Shah (University of Illinois at Urbana-Champaign)

The Roles of Ecosystem Incumbents on Social Entrepreneurship: A Semiotic Approach
Sang-Joon Kim (Ewha Womans University)
Jaehong Park (Chung-Ang University)
Jihyeon Lee (Ewha Womans University)

Entrepreneurship, Identity, and the Poor
David L. Bodde (Clemson University)
Caron St. John (University of Alabama, Huntsville)

1E: Technological Change and Incumbent Response (TM)

Location

Chair:

Product Strategy in a Nascent Market: The Effect of Complementary Products on New Product Design
Cameron D. Miller (Syracuse University)

Integrating TAM and COR Theories to Exploring Workers Use Behaviors Toward an AI-Enabled Assistance System

Nien-Chi Liu (National Central University & Pervasive Artificial Intelligence Research (PAIR) Labs)
Yi-Ting Lin (National Central University & Pervasive Artificial Intelligence Research (PAIR) Labs)
Yung-Chun Wang (National Central University & Pervasive Artificial Intelligence Research (PAIR))

Technology Convergence of Emerging Sectors: An Empirical Study on the Technology Fusion of Intelligent Technologies

ShihHsin Chen (National Chiao Tung University)
Tsung-Yu Chen (National Chiao Tung University)
Chi-Ching Lin (National Chiao Tung University)
Thanh Tri Nguyen (National Chiao Tung University)

Ecosystem Bottleneck Evolution and Value Creation in the Online Video Ecosystem

Jang, Jungyoon (University of Pittsburgh)
John E. Prescott (University of Pittsburgh)

Upstream and Downstream Capabilities of Incumbents: A Conceptual Framework for Navigating a Disruptive Technological Change

Xi Zhang (New Jersey Institute of Technology)

1F: Preparing for the Future of Work (LMO&ER)

Location

Chair:

Engineering Technology Student Perception and Knowledge of Future Workplace Skills and Career Desires: A Qualitative Case Study

Kristin K. Frady (Clemson University)
Claretha Hughes (University of Arkansas)
Daniel Stockwell (Clemson University)

The Future of Work

Matt Poepsel (The Predictive Index)

Characteristics of the Work of the Future

Wendy Chen (George Mason University)

1G: Learning and Decision Making in Operational Systems (O&SN)

Location

Chair:

Adaptation of Business Models to Industry Evolution: Case of Dell and Global Personal Computer Industry

Shardul S. Phadnis (Malaysia Institute for Supply Chain Innovation)

Organizational Inefficiencies: A Knowledge-Based Examination in Medical Device Manufacturing

Jeffrey Macher (Georgetown University)

Taming the Bull: Mitigation of Inventory and Ordering Amplification in Multi-Echelon Supply Chains

James Paine (MIT)

An Analysis of Shopping Activity at Warehouse-Club Stores and Its Network-Density Implications

Stanley Lim (University of San Diego)

It May be Time to Clean out the Clutter: Defining Product Deletion from the Viewpoint of Academics and Practitioners

Jatinder N. D. Gupta (University of Alabama in Huntsville)
Qingyun Zhu (University of Alabama in Huntsville)

1H: Exploring Skills Required for a VUCA Future (GIS)

Location

Chair: Jeanne Enders (Portland State University)

The Implications of Interdisciplinary R&D for Research Productivity: The Role of Knowledge Variety and Dissimilarity in the Presence of Complementarities

Melissa Appleyard (Portland State University)

Turanay Caner (North Carolina State University)

Three Paradigms for Educating Leaders for a VUCA Future in Business

Jeanne Enders (Portland State University)

Albrecht Enders (Endersgroup)

Bringing Futures/Foresight Thinking to the Social Work Profession - Focus on the Future of Health, Equity and Care

Laura Burney Nissen (Portland State University)

1I: Roundtable Discussion: Inequality and Work—Looking Ahead (LMO&ER) Location

In the last two years, the UC-Berkeley Labor Center, partnership Working Partnerships USA, has commissioned a series of industry studies, including on trucking, warehouses and logistics, retail trade, and food distribution (from store bought to home delivery) <http://laborcenter.berkeley.edu/topic/future-of-workers/>. The Center's and WPUSA's approach has also emphasized the importance of worker and union input into debate and implementation of new technologies, organizing for example a summit on "The Future of Workers" in February 2020.

IWPR has conducted several recent studies on women and the future of work available at <https://iwpr.org/publications/women-automation-future-of-work/> and https://iwpr.org/publication_types/report/. IWPR and Dr. Childers also focus much of their research on inequality including based on gender and race and in partnership with Aspen Institute's Economic Opportunities program.

Like other states, Pennsylvania has begun to consider potential challenges and opportunities for state government from the future of work and the ripple effects across programs, social benefits/protections, and agencies—all of them premised to some degree on possibly outdated assumptions about full-time employment as the "norm." The PA Department of Labor & Industry is also a participant in the National Governors' Association On-Demand Economy project.

The Institute for Work & the Economy organized a national conference in Chicago on "Many Futures of Work" in October 2017, edited papers from which will appear in a forthcoming book. Creticos and the Institute are also partners to a National Governors Association project with nine states (Alabama, Colorado, Connecticut, Hawaii, Illinois, Maryland, New Jersey, Pennsylvania and Virginia) that seeks to understand the on-demand economy and identify policies that would increase economic opportunity for on-demand workers.

Chair: Stephen Herzenberg (Keystone Research Center)

Panelists:

Katie Corrigan (AFL-CIO)

Lisa Kresge (UC Berkeley Labor Center)

Jesse H.F. Hammerling (UC Berkeley)

Peter Creticos (Institute for Work & the Economy)

Chandra Childers (The Institute for Women's Policy Research (IWPR))

Thomas Foley (Pennsylvania Dept. of Labor & Industry)

Kelly Martini (Pennsylvania Dept. of Labor & Industry)

LUNCHEON & PLENARY II

12:00 pm—1:30 pm

Location

PANEL SESSION TWO 1:45 pm—3:00 pm

2A: A Path to Energy Transition (EP&S)

Location

Chair:

Developing the Elusive Construct of Speed-cost Efficiency
Minjae Lee (Southern Connecticut State University)

Recovering Oil and Natural Gas From Deep Shale Layers
Frederick H. Abernathy (Harvard University)

Community Solar Programs: Factors Influencing Adoption Trends and Patterns
Ekundayo Shittu (The George Washington University)
Dor Hirsh Bar Gai (The George Washington University)
Carmen Weigelt (Tulane University)

Ready...Set...No! Canada's Failure to Get Out of the Oil and Gas Pipeline Starting Blocks: Is there a Path Forward?
Robert Mahnic (UGSM - Monarch Business School Switzerland)

Investing in Energy Transition: A Firm's Perspective
Sofia Berdysheva (TUM School of Management)
Svetlana A. Ikonnikova (TUM School of Management)

2B: Work of the Future in Eds and Meds (LMO&ER)

Location

Chair: Francoise Carre (University of Massachusetts Boston)

The Future of Work in Healthcare
Linda Rhodes (Public Works)

In Search of an Inclusive Model for the AI Economy
Denise Dowell (Keystone Research Center)
Stephen Herzenberg (Keystone Research Center)

Technological Change in Healthcare Delivery
Adam Seth Litwin (Cornell University)

Corporate Social Responsibility to Employees with the Onset of Artificial Intelligence
Arlene J. Nicholas (Salve Regina University)

Thursday, June 4

2C: Technology Absorption and Diffusion (G:M&PI)

Location

Chair:

Business Networks and Enclave Formation: Why Foreign Investment Fails to Transfer Technology
Michael Murphree (University of South Carolina)

Market Coverage, Competitive Pressure, or Risk Reduction? Exploring the Interplay of Multi-level Drivers of International Technology Diffusion

Xue Gao (University of Miami)

Yi Zhang (University of Technology Sydney)

Work of the Future—The Case of Brazil

Timothy Sturgeon (Massachusetts Institute of Technology)

CONFERENCE CLOSING REMARKS & BUSINESS MEETING

4:10 pm — 5:00 pm

Samberg Salon MIT

DRAFT

Friday, June 5
9:00—10:00 am

Panelists' Bios

SPECIAL FEATURE II: Ghost Work: How to Stop Silicon Valley from Building a New Global Underclass

In the age of the gig economy and fissured work, the emergence of new artificial intelligence (AI) technologies have created "ghost work." Authors Mary L. Gray and Siddharth Suri of Microsoft Research coin the term to describe the invisible labor that supports technology platforms reliant on AI. From labeling images to classification tasks to cleaning up databases, contract workers at all skill levels are engaging in project-based, task-driven work to make unstructured data structured. Gray, an anthropologist by training, as well as several discussants, will discuss the likely trajectory for this type of work given the increasing use of AI, the implications for workers and their work conditions, and potential policy responses that could "stop making our lives wrap around work, and start making work serve our lives."

Facilitator: Jerry Jacobs

PLENARY III: Pricing and Innovating: A Plenary on a Crossroad for the Biotechnology Industry

The innovation process is becoming more complex. Innovation emerges at the interstices of multiple disciplines and draws on disparate resources and data, involving multiple stakeholders who are often distributed globally. Few industries exhibit this complexity better than the biotechnology industry. In biotechnology, manufacturers, regulators, payers, providers, researchers and patients all navigate a dynamic social, political and economic environment in order to develop and make available new, more efficacious drugs for patients. For these stakeholders to work together is one challenge. Pricing the drugs which are critical to them all is – for various reasons – another challenge. This plenary will address these challenges, and how the biotechnology industry strives to create effective innovation ecosystems that serve the needs of its multiple stakeholders.

Friday, June 5

SPECIAL FEATURE II

9:00 am—10:00 am

Samberg Salon MIT

BREAK 10:00 am—10:15 am

Samberg 6th Floor Lobby

PANEL SESSION FOUR 10:15 am —11:30 am

4A: Energy and Sustainability (EP&S)

Location

Chair:

Allocating Tradeable Permits in Multiple-Period Production Process: A Dynamic DEA Approach

Utsav Pandey (Indian Institute of Management, Calcutta)

Sanjeet Singh (Indian Institute of Management, Calcutta)

A Country-Level Analysis of Mobile Phones and Environmental Sustainability

Namchul Shin (Pace University)

Jason Dedrick (Syracuse University)

Owning Windfarms or Sourcing for Wind Energy: The Role of Contractual Hazards and Capabilities in the Supply-Side Market for Wind Energy

Ekundayo Shittu (The George Washington University)

Carmen Weigelt (Tulane University)

Geoffrey Parker (Dartmouth College)

4B: Technology and Future of Healthcare (H)

Location

Chair:

Technological Bargaining Power: The German Care Crisis and its Consequences for the Implementation of Digital Technologies

Peter Wegenschimmel (Regensburg University of Applied Sciences)

Technological Change in Healthcare Delivery: Its Drivers and Consequences for Work & Workers

Adam Seth Litwin (Cornell University)

Enhancing Innovation in Multi-party Cooperation through Federated Machine Learning

Jennifer Woolley (Santa Clara University)

AI in Collaborative Groups

Vincent Rice (Brown University)

Chester Spell (The State University of New Jersey)

Terri Griffith (Simon Fraser University)

Katerina Bezrukova (University at Buffalo)

Evangeline Yang (University at Buffalo)

The Future of Work for Health Informatics and Information Management Professionals

Susan Fenton (UT School of Biomedical Informatics)

Karima H. Lalani (RHIATexas State University)

Friday, June 5

4C: Institutional Innovations in the Manufacturing Ecosystem: New State and Regional Programs to Combat Old Problems (GIS) **Location**

Chair: Elisabeth Reynolds (Massachusetts Institute of Technology)

Moderator: Barbara Dyer (MIT, Good Companies, Good Jobs)

Respondent: Ira Moscovitz (Director of Advanced Manufacturing Programs at the Mass Tech Innovation Institute)

The US Manufacturing Ecosystem: What Has Changed Since the Great Recession?

Daniel Traficonte (MIT)

Elisabeth Reynolds (MIT)

Anna Waldman-Brown (MIT)

Genesis at Work: Advancing Inclusive Innovation through Manufacturing Extension

Nichola Lowe (UNC Chapel Hill)

Greg Schrock (Portland State)

Ranita Jain (Aspen Institute)

Maureen Conway (Aspen Institute)

Cultivating Communities: When and Why Employers Engage in Workforce Development Programs

Jenna Myers (MIT)

Rebuilding the U.S. Manufacturing Ecosystem

William Bonvillian (MIT)

4D: Entrepreneurs and Their Strategies (I&E) **Location**

Chair:

Threats to the Future of Work: Discovering New Uses for Existing Innovations

Rebecca Karp (Boston University)

Learning from External Advice: How do Entrepreneurs Decide to Pursue a Broad or Focused Strategy?

Amisha Miller (Boston University)

Siobhan O'Mahony (Boston University)

Susan Cohen (University of Georgia)

Entry into Misfit Markets: Evidence from the Solar Photovoltaic Industry

Mara Guerra (Imperial College Business School)

Non-Action as Entrepreneurial Choice

Mirva Peltoniemi (University School of Business and Economics, Finland)

Shardul Phadnis (Malaysia Institute for Supply Chain Innovation)
Nitin Joglekar (Boston University)

Friday, June 5

4H: A New Category of Work: "Self-Sufficient Production" Advanced by the Third Digital Revolution (GIS)

Location

Chair: Joel Cutcher-Gershenfeld (Brandeis University)

The Third Digital Revolution
Neil Gershenfeld (MIT)

Self-Sufficient Production
Joel Cutcher-Gershenfeld (Brandeis University)
Alan Gershenfeld (E-line Media)

Digital Fabrication and Innovation
Julia Hansen (Cambridge Innovation Center)

4I: Labor Markets and Employment Patterns (LMO&ER)

Location

Chair:

The Role of Migrants in the US Economy: An Analysis of Demographic and Economic Patterns
Sharmistha Bagghi-Sen (State University of New York - Buffalo)

Female Labor Participation and Public Transportation: Evidence From a Natural Experiment in Mexico
Jorge O. Moreno (Facultad de Economía, UANL)
Jaime J. Escobedo (Facultad de Economía, UANL)
Cecilia Y. Cuellar (Facultad de Economía, UANL)

State Business Incentives and Employment Growth: Evidence Across Firm Size and Age
Abraham Song (George Mason University)

Job Polarization, Digitalization and the Geography of the EU Markets
Georgios Petropoulos (MIT and Bruegel)
Sybrand Brekelmans (Bruegel)

LUNCHEON & PLENARY III

11:45 am – 1:00 pm

Samberg Salon MIT

PANEL SESSION FIVE 1:15 pm — 2:30 pm

Friday, June 5

5A: Clean Energy Innovation: Dominant Designs, Spillovers, and the Influence of Policy (EP&S)

Location

Chair: David Hart (George Mason University)

Did China's Production Surge Lead to Stranded Innovation in Solar Photovoltaics?
David Hart (George Mason University)

Catching-up in Complex Technology Industries – A Patent-Citation Network Analysis to Identify Windows of Opportunity in the Lithium-ion Battery Industry
Martin Beuse (ETH-Zurkich)

Tobias Schmidt (ETH-Zurkich)

A Novel Method for Identifying Breakthrough Technology Spillovers into Solar Photovoltaics
Anna P. Goldstein (University of Massachusetts and Harvard University)
Sergey Kolesnikov (University of Cambridge)
Bixuan Sun (University of Minnesota)
Gabriel Chan (University of Minnesota)
Venkatesh Narayanamurti (Harvard University)
Laura Diaz Anadon (University of Cambridge)

5B: Exploring the Consequences of Alternative Work Practices and Organizational Arrangements (LMO&ER)

Location

Chair:

Shifting the Risk: How Scheduling Practices Impact Warehouse Workers
Alexander Kowalski (MIT)
Erin L. Kelly (MIT)
Hazhir Rahmandad (MIT)

Organizational Response to Workforce Aging Across Three Industries: Tensions in Human Capital Perspectives
Peter Berg (Michigan State University)
Matthew Piszczek (Wayne State University)

Time Matters: A Temporal Instability of Employment Relations and Organizational Performance
Hyesook Chung (Cornell University)

Exploring Local Social Capital Development in Remote Work Contexts
Sarah Soroui (Brandeis University)

Nuancing the Changing Nursing Workforce's Implications for Workplace Communication
Ivan Gan (University of Houston-Downtown)

5C: The Role of National and Subnational Institutions (G:M&PI)

Location

Chair:

The New Institutional Economics Approach and Understanding Geographical Indication Supply Chains
Pelin Bicen (Suffolk University)

Union Avoidance Goes Global: The Big Three Labor & Employment Firms in the 21st Century
John Logan (San Francisco State University)

The Effect of Subnational Legal Effectiveness and Social Trust on Foreign Firm Performance: Insights from Subnational Analysis in Emerging Economies

Yu Jia (Wuhan University)
Tao Wang (Wuhan University)
Zhuang Ma (International Business School)
Jiayu Lyu (Wuhan University)

Friday, June 5

5E: Evolution of Complex Systems and Technologies (TM)

Location

Chair:

Privacy Please! Avoidance of Conflicts with Data Protection Law, in the Field of Robotic Process Automation Through the Use of Digital Twins

Julian Koch (South Westphalia University of Applied Sciences, Hagen, Germany)

Michael Trampler (South Westphalia University of Applied Sciences, Hagen, Germany)

André Coners (South Westphalia University of Applied Sciences, Hagen, Germany)

The Digital Era and the Future of Work

Jerry Fjermestad (New Jersey Institute of Technology)

Stephan Kudyba (New Jersey Institute of Technology)

Evaluation and Selection of Complex Human-Machine Technologies based on Web of Systems Performance

Raja Roy (New Jersey Institute of Technology)

Cheickna Sylla (New Jersey Institute of Technology)

Learning from the WordPress Ecosystem: A Focus on Themes and a Supplemental Technology Stack

Sean M. Hackett (Aoyama Gakuin University)

Evolution of Flying and Firearms from Crafts to Sciences

Roger Bohn (UC San Diego)

5F: Workplace Learning, Training, and Certification: Implications for Organizations, Workers, and Higher Education Institutions (LMO&ER)

Location

Chair:

Exploring State Variations in Non-degree Professional Credentials

Henry Renski (University of Massachusetts Amherst)

Allison Forbes (Center for Regional Competitiveness (CREC))

Is There Power at the Margins? Large and Small Actors in Regional Training Systems

Allison Forbes (MIT)

Rethinking Workplace Learning: The Role of Academic Partnerships With Industry

Inez Von Weitershausen (MIT)

5G: The Digitalization of Operations and Supply Chain Eco-Systems (O&SN) Location

Chair:

Understanding Disruptive Technologies and Digital Supply Chain Ecosystems: Comparing Montreal and Atlanta

Diane Alleva Caceres (Georgia Institute of Technology)

Catherine Beaudry (Polytechnique Montreal)

Laurence Solar-Pelletie (Polytechnique Montreal)

Digitalisation Efforts in OSCM: Evidence from the Pharmaceutical Sector
